

A red Eagle 407 HP helicopter is shown in flight over a rugged, snow-covered mountain range. The helicopter is viewed from a low angle, emphasizing its size and the steepness of the terrain. The sky is clear and blue. The helicopter's registration number, C-GXXH, is visible on the side of the fuselage. The words "EAGLE" and "Honeywell Powered" are also visible on the helicopter's body.

HOT. HIGH. AND VERY COOL.

Hot. High. **AND VERY COOL.**

The Eagle 407HP conversion replaces the Rolls Royce C47 turbine engine with a next-generation Honeywell HTS900, substantially improving high-altitude and hot ambient temperature performance of the Bell 407 - already one of the best and most versatile helicopters ever made - to give you a faster and more powerful, yet surprisingly, more fuel efficient aircraft.

Better Fuel Efficiency. **MORE COST SAVINGS.**

The next-generation technologies at work in the Honeywell engine combine to deliver more power while occupying less cubic space and burning 17% less fuel. The lower fuel consumption of course, increases both operational savings and simultaneously increases the endurance.

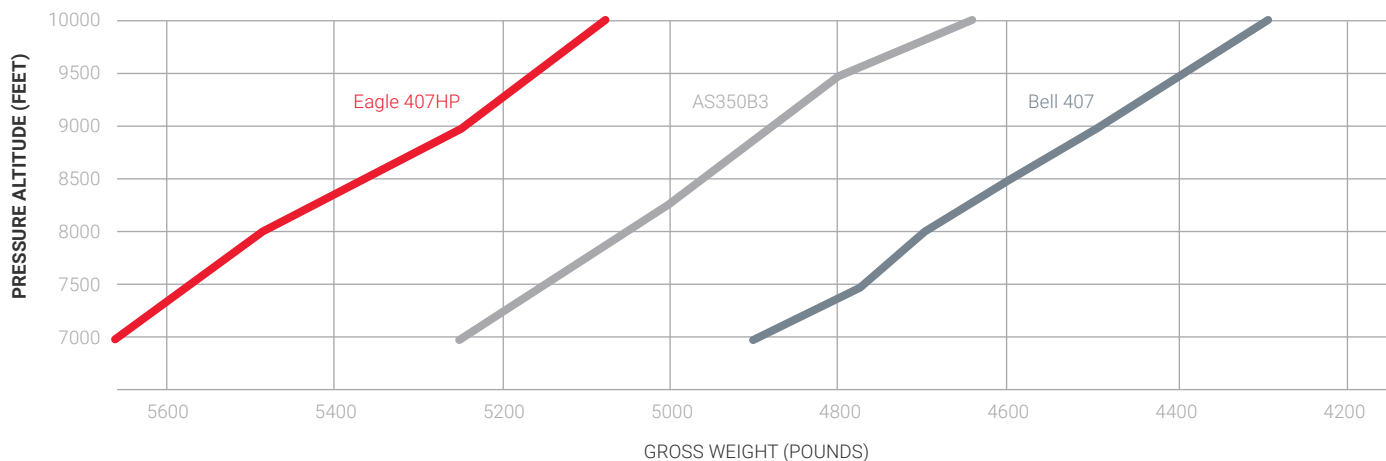

More Power To You. **MORE PAYLOAD TOO.**

The Eagle Copters conversion improves the payload capability of your Bell 407 helicopter by an estimated 19% at 10,000 feet, significantly increasing the aircraft's capability over a wider operating spectrum. The powerful new Honeywell HTS900 engine delivers an output of 1,021 shaft horsepower — a 22% improvement in output at high and hot conditions over the incumbent engine.

Ready For Action. **THE ALL-SECTOR SUPERHERO.**

Developed with 'safety, performance and affordability' as top requirements, the Eagle 407HP is ideally suited for playing an even more demanding role wherever outperformance is a must: in security and law enforcement, utility services such as pipeline and power line construction, forest management, heli-sports, firefighting, EMS and more.

HOVER CEILING OUT OF GROUND EFFECT COMPARISON (20°C)

THE BREAKTHROUGH THAT BELL 407 OPERATORS HAVE BEEN WAITING FOR IS HERE!

Currently approved in Canada, USA, Mexico, Chile, Indonesia, Papua New Guinea and Australia, the Eagle 407HP is ready to take on the most challenging high-temperature and high-altitude operations.

Powered by the Honeywell HTS900, the Eagle 407HP gives you increased power, payload and range capabilities, for the performance you need to do your job safely and more efficiently.
